

# Megapixel Lenses

5MP 2.8-12mm and 5MP 5-50mm 1/2.7", DC Auto-Iris, CS Mount Lenses

Costar lenses are made of high index optical glass elements which produce a rich and razor sharp image. Specifically designed to use with high-resolution cameras, these lenses are available in DC Auto-Iris configurations. Auto iris lenses are used primarily externally where there are variations in the lighting levels.
