GV-FWC Version History

Firmware V1.02 2020-07-31

Fixed:

- Cybersecurity enhanced as follows:
 - Fixing misuse of the same cryptographic key to prevent MITM attacks
 - Requiring certain levels of authentication for system log disclosure
 - Buffer overflow vulnerability addressed, with enhanced security protecting devices from plausible unauthenticated cyberattacks

Modified:

- Requiring users to set a new password upon first-time login
- Password strength of “Normal” or higher required when changing the password of Administrator user account
- Support for sending unknown face events, along with an empty card number “000-00000”, to GV-ASManager when the “Face + Card with Wiegand A/B” mode is selected on the Web interface of the connected GV-ASController
- Copyright notices accessible on the Web UI
