CONVERTER

LINK

POWER

The front panel features a BNC connector at the top, followed by two screws. Below the model name is a BNC-to-coaxial adapter. Underneath is an RJ45 Ethernet port. At the bottom are two status LEDs labeled 'LINK' and 'POWER', two screws, and a diagonal slash symbol.

WISeNET

The main chassis is a rectangular metal enclosure with 'WISeNET' printed in large letters. It has mounting ears on the left side with two screws and two mounting tabs on the top and bottom. A BNC connector is located on the left side of the top and bottom edges. A power jack is on the right side.

PWR

GND

+Vin

The rear panel features two screws at the top, a power jack with three terminals labeled 'PWR', 'GND', and '+Vin', and two screws at the bottom. A mounting tab is on the right side.
