CONVERTER

LINK

POWER

The front panel features a top-left screw, a diagonal slash symbol, and a top-right screw. Below the model name is a BNC connector, followed by an RJ45 port. Two status LEDs are labeled 'LINK' and 'POWER'. The bottom-left and bottom-right corners each have a screw.

WISENET

The main body is a rectangular metal enclosure with 'WISENET' printed in large letters. It has a top and bottom mounting tab with a central screw hole. On the left side, there are two BNC connectors. On the right side, there is an RJ45 port.

PWR

GND

+Vin

The rear panel features a power connector with three terminals labeled 'GND', '+Vin', and 'PWR'. It has screws at the top-left and top-right corners, and a screw at the bottom-right corner. A mounting tab is located at the bottom.
