CONVERTER

The front panel features a BNC connector at the top, followed by two screws. Below the screws is a BNC connector, then an RJ45 Ethernet port. At the bottom of the panel are two status LEDs labeled 'LINK' and 'POWER', two screws, and a diagonal slash symbol.

The main body of the device is a rectangular metal enclosure with rounded corners. The word 'WISeNET' is printed in a large, bold, sans-serif font in the center. On the top and bottom edges, there are two mounting tabs, each with a '+' symbol. On the left side, there are two BNC connectors. On the right side, there is a BNC connector.

The rear panel features two screws at the top. At the bottom, there is a power input section with a terminal block labeled 'PWR' containing two terminals, 'GND' and '+Vin'. Below the terminal block are two screws.
