GV-3D People Counter V2 Version History

Firmware V1.04 2020-09-04

Fixed:

- Warning message in the HTTP response header modified

Firmware V1.03 2020-06-16

New:

- Toggle Mode added to the Alarm setting for triggering an alarm output for as long as the predefined maximum occupancy is exceeded
- Support for combining the counting data of all the devices within groups to trigger occupancy alarms

Modified:

- Counting Signage page to appear upon login to the Web interface indicating the real-time counting data
- Copyright notices accessible on the Web UI

Fixed:

- Chances of failure to send e-mail reports of the counting data as scheduled in the Export setting

Firmware V1.02 2019-05-17

New:

- Periodic counting push report sent to a designated server
- Support for displaying dwell time in a specified area

Improved:

- Setting restriction to only allow 4 numerical characters to be typed into the Year field

Fixed:

- Schedule Counting error when the time zone is set as UTC-01:00 ~ UTC-12:00

Firmware V1.01 2018-04-24

New:

- Support for triggering a digital output when the indoor occupancy exceeds the limit of Maximum Occupancy
- Support for starting people counting only upon reception of an input signal
- Support for a guest user's account
- Ability to minimize false counts caused by lingering people near the counting zone

Fixed:

- Inability to restore the Setup page back to default by clicking Reset
- Inability to change Network Type to DHCP or Static IP after PPPoE has been connected
